

FROM A SKETCH ON A NAPKIN TO TRANSFORMING THE OUTBOARD MARKET

At OXE Marine we are driven by the ambition to transform the outboard motor; impacting the journey towards a more sustainable and ecologically positive marine environment. It all started with an idea, a sketch on a napkin. It continued with a great drive of knowledge, passion and will, to create durable, safe and reliable products.

Sweden-based OXE Marine was founded in 2012 with the ambition to create the world's first high-performance diesel outboard developed primarily for commercial use. We are driven by a passion to develop, improve, keep building and finalize our first diesel outboard, the OXE Diesel, in the spring of 2014. Today, we are a growing company with products available on different markets, with the ambition to keep growing to provide commercial marine solutions that are safer for people and our planet.

DESIGN ENGINEER

Do you want to join an exiting company in development and growth and work with innovative and revolutionized products? Join us as a Design Engineer and be part of a journey where we transform into an industrial company and making a cultural change! You will get the chance to develop through exciting projects and work in a small company with a strong brand in a growing industry with innovative and revolutionized products. You will be a valued colleague and be part of a competent and committed team!

As a Design Engineer at OXE Marine you will get the opportunity to develop, design and verify new solutions for marine propulsion systems! Develop existing products and optimize towards energy efficiency and service life requirements, work in both projects and with product changes initiated by production and aftermarket. The role as Design Engineer is both theoretically and practically, you will follow the product from idea via prototype to finished product. You will also have contact with suppliers, both nationally and internationally.

Requirements for this role:

- Work experience with Mechanical engineering in a Technology industry
- Experience in working in close cooperation with suppliers and manufacturers
- Experience with CAD. Meriting with knowledge in Solid Works and/ or Teamcenter
- Good practical and theoretical knowledge
- University degree in Mechanical Engineering

This role is based in Ängelholm or Gothenburg.
Regular travels to Ängelholm are required.
